

## Press Release

Rosbach, March 14, 2007

### **DEV Sytemtechnik invests in know-how and products**

#### **Mark Stachen takes over management of the R&D department**

***Rosbach, March 14, 2007. DEV Systemtechnik further strengthens its R&D department: With immediate effect, Mark Stachen manages the research and development department and is responsible for further expansion of DEVs product portfolio. Mark Stachen draws on extensive professional experience and as a well-versed process engineer, he will set new highlights in DEV's development of powerful, high-performance RF signal transmission solutions.***

With Mark Stachen, DEV Systemtechnik has not only managed to recruit an internationally experienced specialist, but has also made a long-term investment in know-how and expertise: Stachen, who graduated in physics, is from now on responsible for the strategic expansion of the DEV development department. Stachen, who previously worked as a project manager and engineer in Spain and the Netherlands, has a wealth of cross-industry experience.

The philosophy with which the 33 year-old approaches his job at DEV, also reflects his interaction with clients and colleagues. Stachen says; "High quality work, direct communication and in particular an open and honest collaboration are the keys to success" and he adds: "DEV is one of the leading RF signal routing specialists in the world. I look forward to playing an active role in the success of the company."

"We are convinced that we have made the right choice by recruiting Mark Stachen" says DEV's General Manager, Jörg Schmidt. "A man of such experience and expertise is a true asset for our company."
