DEV opens Branch Office in Switzerland!

The specialist in RF signal routing grows further

DEV meets the growing market demands and provides local presence and competence in Switzerland and France. The first branch office of DEV Systemtechnik GmbH & Co. KG has been opened on 1st October 2005 with Pascal Roulet as designated Manager Branch Office. With over 15 years commercial experience he had his focus in the European SATCom & CATV market in the last years and therefore is able to give best support in local language. He will be in close contact with customers and local partners likewise who will benefit from his up-to-date knowledge about DEVs high performance solutions. "Our products are positioned in the professional high-end segment and on-site consultancy is essential for our customers to design their RF signal routing systems in cable head ends and satellite ground stations. Therefore we adapted our organization to respond to the growing market requirements in Switzerland and France to ensure satisfaction of our partners and customers" stated Jörg Schmidt, General Manager of DEV Systemtechnik in Germany.

DEV Systemtechnik is an innovative company focused on RF-Products. In close cooperation with qualified partners DEV develops and produces solutions to route RF signals according to customers needs such as L-Band Splitters, RF Switching Systems, CATV-Band Combiners. In addition to a comprehensive standard product portfolio for CATV and SATCom applications DEV designs individually tailored solutions for RF signal routing tasks from DC to 26,5GHz.
