DEV has won the Deloitte Technology Fast 50 Award for the second time in succession

DEV Systemtechnik finds the balance between growth and expansion

In 2008, DEV Systemtechnik has again been ranked among the top 50 companies of the Deloitte Technology Fast 50 Award. The specialist for the development and production of electrical and optical RF signal transmission systems and devices landed on 3^d place in the category "Communications". With a sustained revenue growth of more than 462% over the past 5 years, this success is the result of the company's spirit of innovation and willingness to take entrepreneurial risks, and has yielded DEV stable growth rates.

For the past six years, the accounting/consulting firm Deloitte & Touche has been awarding Germany's 50 most successful technology companies. Said companies are characterised by a strong drive for innovation, entrepreneurial spirit and outstanding performances. The companies are from the sectors of information technology, communication, energy and software. The Award, which was first presented in the US in 1995, has since become an internationally recognised quality label for entrepreneurial success in the technology sector.

About DEV Systemtechnik

DEV Systemtechnik GmbH & Co. KG is the first choice for the transmission and distribution of radio frequency signals as, for instance, required in head end stations. The company develops and produces leading-edge products and systems for the entire signal transmission path. The portfolio from DEV comprises fully coordinated product solutions, from antenna to receiver. All products are "Made in Germany" and meet the highest demands on system availability, reliability and controllability.
