

DEV Systemtechnik Expands US Presence

European TV technology supplier, noted for satellite, RF, and fiber-optic signal expertise, forms DEV America

July 5, 2011 -- Newport Beach, California - [DEV Systemtechnik](#), Germany, announced the expansion of its North American presence with the formation of a U.S. subsidiary, [DEV America](#).

DEV America will support growing customer requirements for the company's leading-edge products that help satellite and cable television systems [transmit](#), receive, [switch](#), and [distribute RF signals](#) over coaxial and [fiber optic cable](#).

"For years, our customers and [leading broadcast systems integrators](#) have chosen to deploy DEV equipment in solutions for critical on-air broadcast and satellite systems throughout the US," said DEV CEO Joerg Schmidt. "With our increased US presence, DEV will be even better positioned to meet growing demand for our advanced technologies from satellite teleports, uplinks, direct-to-home (DTH) and IPTV head ends, as well as cable TV systems and playout facilities."

"We also look forward to working closely with our current and new distributors in the US to help customers achieve the highest signal quality and reliability while reducing costs, overhead, rack space, power and heat consumption," he added.

About DEV America: DEV America (www.dev-america.com) develops and produces a complete range of leading-edge, high-performance [products](#) and systems for the optical and electrical transmission of Radio Frequency (RF) signals via coaxial cable or fiber for satellite, cable, and broadcast television head ends. DEV products include [distribution amplifiers](#), splitters and combiners, [switching systems](#), distributing matrices, routing products, [multiplexers](#), and [fiber-optic RF signal transmission systems](#) – all built to meet the highest standards of system availability, reliability and controllability. DEV America is a subsidiary of Germany-based [DEV Systemtechnik GmbH & Co. KG](#), which is among the fastest growing companies in the RF technology arena. Named several times to the Deloitte Fast 50 list, DEV has achieved a compound growth rate of 462% over five years. DEV America will serve customers in North America from Newport Beach, California.
